

Sebazole® shampoo offers broad-spectrum antibacterial action & aids in the treatment of ringworm.

# Sebazole®

KERATOLYTIC, KERATOPLASTIC, ANTIBACTERIAL, ANTIFUNGAL AND ANTIPRURITIC WASH FOR DOGS AND CATS

## WHAT IS SEBAZOLE®?

- ✓ Antipruritic shampoo for greasy, infected, smelly skin
- ✓ Keratolytic and keratoplastic actions
- ✓ For dogs or cats
- ✓ Ideal for scaling, flaking skin conditions (seborrhoea)

## WHY CHOOSE SEBAZOLE®?

### 1. Strong anti-fungal action

Offers broad-spectrum activity against fungi (dermatophytes), yeasts and moulds / gram positive bacteria.

### 2. Removes greasy, crusty residue on skin

Contains sulphur and sodium salicylate which soften, loosen & remove (keratolytic effect) scales and crusts associated with seborrhoea— and which have a healing (keratoplastic) effect on the skin.

### 3. Antibacterial and antiseptic

Combats the causative organisms of seborrhoea disorders including *M. pachydermatis* and *Staphylococcus intermedius*.

## HOW TO USE SEBAZOLE®

### INDICATIONS

For cats and dogs with skin infections caused by bacteria, fungi or yeasts.

### RECOMMENDED FOR USE IN

- Dogs and cats affected by *Malassezia Dermatis*, localised dermatophyte or generalised fungal infections.

### COMPOSITION

Econazole nitrate	10 mg/mL
Sulphur (as sodium thiosulphate 75mg)	19.4 mg/mL
Sodium salicylate	35 mg/mL
Chloroxylenol	5 mg/mL

### PRESENTATION

250mL

### DIRECTIONS FOR USE

1. Wet coat with warm water.
  2. Massage Sebazole into wet coat & lather freely, then rinse.
  3. Repeat the above but allow the lather to remain on the skin 5–10 minutes before rinsing well.
- 2–3 applications per week for up to 4 weeks may be necessary for some skin disorders.
